IMS Tracker: August 2011

August IMS Strong; September Trend Confirmation

Important: Total August IMS sales were up 68% over July and up 189% Y/Y at \$15.6MM, an all time high. New launches of gemcitabine, Zosyn, and levofloxacin accounted for 92% of sequential growth and 57% of year over year gains. Excluding these new products, sales were up 5% MoM, flat QoQ, and up 81% year over year. The current weekly run rate (assuming no growth in September) implies ~\$44MM in sales 3Q compared to MSe of \$43MM which is encouraging after a soft 2Q. However, we caution against over interpreting this data as IMS capture has been variable so that continuation of these trends through September will be key.

New launches tracking well:

1) Gemcitabine strong but sustainability is the question with a very strong month at ~\$5M in sales, which accounted for nearly 100% of the new product growth with small contributions from levofloxacin and Zosyn. This is consistent with positive launch commentary from Sagent and a gain of nearly 26% unit share in August.

2) Levofloxacin launch gaining some momentum. Sagent has ~45% share of the generic IV levofloxacin market in August up from ~30% in July in a two player market. We suspect capture is incomplete, but at the current IMS rate, sales for 2Q are in the ~\$2MM range and ~\$4-5MM in 2H11.

3) Zosyn is making slow progress with 2-3% share consistent with management commentary on this product.

Topotecan, Heparin and Cefepime: Sagent's share was 16% in August vs. 16% in June for Topotecan. Heparin share was ~ 16% where it has been YTD. Finally, cefepime share of ~ 33% vs. 32% in July. These products accounted for 37% of sales vs. 61% in July.

Sagent 3Q11 IMS Trend Through August

Sagent Product Sales

Total IMS sales were up 68% over July and up 189% Y/Y. QTD sales are up 166% year over year. New launches of gemcitabine, Zosyn, and levofloxacin accounted for 92% of sequential growth and 57% of year over year gains. Excluding these new products, sales were up 5% MoM, flat QoQ, and up 81% year over year. Gemcitabine had a very strong month with ~\$5M in sales, which accounted for nearly 100% of the new product growth with small contributions from levo and Zosyn.

The current weekly run rate (assuming no growth in September) implies ~\$44MM in sales 3Q compared to MSe of \$43MM which is encouraging after a soft 2Q. However, we caution against over interpreting this data since as IMS capture has been variable meaning actual results could be above or below the IMS run rate.

US IMS Product Sales for Sagent

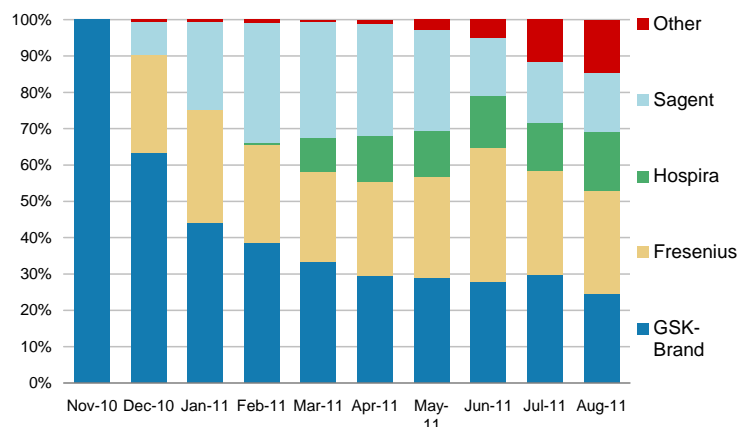

Source: IMS, Morgan Stanley Research.

Topotecan Stable

Sagent's share was 16% in August compared to 16-17% in June and July. This remains below the ~28-30% share after launch given present from new entrants. However, we note Sagent uses several smaller oncology distributors which are captured poorly by IMS.

September 29, 2011
Sagent Pharmaceuticals

Cefepime share flat at ~33%

Sagent's market share was 33%, which is consistent with 32% in July and 29% in June. Weekly average sales were approximately up 8% MoM and down -12% y/y.

Cefepime Share

Heparin share holding flat

Total heparin share was flat sequentially at 16% where it has been all year. Excluding the lock-flush products, share was 18% for Sagent. Sales were down -1% on a weekly average basis over July and the down -6% over the 2Q average.

Pfizer's recent heparin approval has not made an appearance in IMS but Hikma appears to be nearing launch and we look forward to more details on the launch over 2H.

Heparin Share

Levo launch gaining momentum.

Sagent has ~45% share of the generic IV levofloxacin market in August up from ~30% in July in a two player market with Novartis (unit share for the last two months was 43% and 61%). We suspect capture far from complete, but at the current IMS rate, sales for 2Q are in the ~\$2MM range and ~\$4-5MM in 2H11.

Morgan Stanley ModelWare is a proprietary analytic framework that helps clients uncover value, adjusting for distortions and ambiguities created by local accounting regulations. For example, ModelWare EPS adjusts for one-time events, capitalizes operating leases (where their use is significant), and converts inventory from LIFO costing to a FIFO basis. ModelWare also emphasizes the separation of operating performance of a company from its financing for a more complete view of how a company generates earnings.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as

investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of August 31, 2011)

For disclosure purposes only (in accordance with NASD and NYSE requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)		
	Count	% of Total	Count	% of Total IBC	% of Rating Category
Overweight/Buy	1120	41%	460	48%	41%
